

Servos refine performance on Bag making machine

Transicon Ltd have produced an upgrade to a range of FAS bag making machines which looks set to become a standard conversion package to a wide range of customers. Using the latest servo technology, the system upgrade replaces old mechanical variators with high accuracy servo controls. The machines are able to set the seal and perforation operations of the machine with fine accuracy. Concept design, engineering manufacture even installation in our premises at Telford, all provided by Transicon.

Improved accuracy

Improved repeatability

Faster product changeover

Improved reliability

Standard conversion package

For innovative solutions to improve your manufacturing needs, why not contact Transicon on 01952 605515, we're ready to help.
