## TRANSICON APPOINTS NEW Project Engineer

**May 2008** – The Telford-based control systems integrator Transicon Ltd has strengthened its project engineering team with the appointment of Alex Cooper.

With a track record of more than 10 years experience with drives, PLC and servo equipment, Alex takes up this new position with responsibilities for delivering the company's control and automation solutions.

“Alex's appointment reflects the Company's continuing success in expanding our customer base,” says Transicon's Engineering Director, Ian Turpin. “We have just celebrated our first year in the new facility, a year in which we have seen a significant increase in our sales particularly in our target markets like marine & the water industry - expansion of our in – house engineering capability underlines continuing investment for the future. I am therefore delighted to welcome him to the Transicon team, where his knowledge of aluminium processing will benefit Transicon and support continued growth“

“His industry knowledge and expertise will be invaluable in further developing new customers, and allows us to capitalise on our core engineering strengths, reinforcing Transicon's position as a leading supplier of industrial drives, automation and control systems.”

### **About Alex Cooper**

Born in Wolverhampton and educated in Bridgnorth and Wolverhampton, Alex completed his electrical engineering apprenticeship with Star Aluminium (now Bridgnorth Aluminium / Novelis) in Bridgnorth. He subsequently completed a HNC in Electrical / Electronic Engineering and joins Transicon after gaining extensive systems integration experience running his own business.

### **About Transicon Ltd**

Telford-based Transicon has a pedigree than 40 years experience in the design, manufacture, installation and commissioning of drive and automation solutions. The company's offerings include drives systems, PLC and SCADA software programming, HMIs, motor control centres and custom-built panels, as well as high accuracy AC, DC and servo drives and motors.

Certified to BS EN ISO 9001:2000 quality standards and a BSI-registered company, Transicon also offers a comprehensive range of management, consultancy, assembly, in-house testing and support services to customers throughout the utilities, manufacturing, process engineering and automation sectors.
