

TRANSICON

Appointment of new Systems Engineer

June 2011 – The Telford-based control systems integrator Transicon Ltd has further strengthened its project engineering team with the appointment of graduate engineer.

A recent graduate from Cardiff University, with BEng Electrical & Electronics Engineering (1st Class Hons) takes up this new position with responsibilities for delivering the company's control and automation solutions.

“This appointment reflects the Company's continuing success in expanding our customer base during the past year,” says Transicon's Managing Director, Paul Blake. “We recently celebrated our fourth year in the new facility, a year in which we have seen a steady increase in our sales and profitability - expansion of our engineering capability underlines continuing investment for the future. increasing the Transicon engineering team , with hand experience of providing National Instruments compact RIO hardware and Labview software to various industry applications hill support our development of new market segments“

“Although he joins us with limited industry knowledge he has already worked in an industrial steel processing environment and his specific expertise with National Instruments will be invaluable in further developing new customers to reinforce Transicon's position as a leading supplier of drives, automation and control systems.”

About Transicon Ltd

Telford-based Transicon has a pedigree than 40 years experience in the design, manufacture, installation and commissioning of drive and automation solutions. The company's offerings include drives systems, PLC and SCADA software programming, HMIs, motor control centres and custom-built panels, as well as high accuracy AC, DC and servo drives and motors.

Certified to BS EN ISO 9001:2008 quality standards, BSI-registered and an NICEIC-approved contractor, Transicon also offers a comprehensive range of management, consultancy, assembly, testing and support services to customers throughout the utilities, manufacturing, process engineering, marine and automation sectors.
