

Appointment of new sales engineer

March 2018 – The Telford-based control systems integrator Transicon Ltd has further strengthened its Sales Team with the appointment of Steve Flatman as Senior Sales Engineer.

Steve has worked in the Robotics, PLC & Industrial PC, Servo Motion & Variable Speed Drives and SCADA & Industrial Communications field for 20 years, representing several world leading manufacturers across the UK.

“This is a great opportunity to join an already well respected, high quality control systems integrator” says Steve “I am looking forward to developing new business relationships and introducing Transicon’s quality offer to a wide range of contracts”.

“Steve’s appointment reflects the Company’s continuing success in expanding our customer base during this year,” says Transicon’s Sales and Marketing Director, Richard Cotsford. “We have successfully emerged from a record year which saw large orders within the automotive and food & beverage sectors, and this continued expansion of our engineering capability underlines investment for the future. I am therefore delighted to welcome Steve to the Transicon team, especially as he has first hand experience of providing engineering solutions to a wide range of industries which will help continue our development of new market segments.”

“His knowledge of High Precision & High-Speed Servo Motion and Robotics will help us in developing new customers and introducing Transicon as a supplier of complete automation and control systems.”

About Steve

Born in 1977 Steve moved straight into Automation Sales after leaving university, where he studied combined Mechanical & Electrical Engineering. He joins Transicon after gaining extensive experience of industrial control systems, ranging from small ‘single timer in-a-box’ applications up to 400+ axis interpolated servo motion control systems. More recently specialising in Servo Motion and Robotics, Steve is well placed to help build upon Transicon’s already well proven skills.

About Transicon Ltd

Telford-based Transicon has a pedigree of 50 years' experience in the design, manufacture, installation and commissioning of drive and automation solutions. The company's offerings include drives systems, PLC and SCADA software programming, HMIs, motor control centres and custom-built panels, as well as high accuracy AC, DC and servo drives and motors.

Certified to BS EN ISO 9001 quality standards, BSI-registered, Safecontractor and an NICEIC-approved contractor, Transicon also offers a comprehensive range of management, consultancy, assembly, testing and support services to customers throughout the utilities, manufacturing, process engineering, marine and automation sectors.
