

TRANSICON

Appointment of new Senior Systems Engineer

June 2011 – The Telford-based control systems integrator Transicon Ltd has further strengthened its project engineering team with the appointment of Paul Cousins as Senior Control Systems Engineer.

With a track record of more than 25 years design experience with AC and DC Drive Systems and Motion Control Systems, PLC and HMI equipment, Paul takes up this new position with responsibilities for delivering the company's integrated control and automation solutions.

“Paul's appointment reflects the Company's continuing success in expanding our customer base during this year,” says Transicon's Managing Director, Paul Blake. “We have successfully emerged from the difficult trading conditions of the last 18 months and having weathered that storm continued expansion of our engineering capability underlines investment for the future. I am therefore delighted to welcome Paul to the Transicon team, especially as he has first hand experience of providing engineering solutions to a wide range of industries which will help continue our development of new market segments“

“His industry knowledge and expertise will be invaluable in further developing new customers to reinforce Transicon's position as a leading supplier of industrial drives, automation and control systems.”

About Paul Cousins

Born in Madeley and educated in Gwent, Paul completed a full technical engineering apprenticeship with Reliance Electric (now Rockwell Automation) in Telford, gaining a Bachelor of Engineering Degree with Commendation in Electronic and Instrumentation Systems.

He is fully qualified in control systems & applications. He joins Transicon after gaining extensive drive and servo systems integration experience with both Reliance Electric and Control Techniques (Emerson) and lives in Telford.

About Transicon Ltd

Telford-based Transicon has a pedigree than 40 years experience in the design, manufacture, installation and commissioning of drive and automation solutions. The company's offerings include drives systems, PLC and SCADA software programming, HMIs, motor control centres and custom-built panels, as well as high accuracy AC, DC and servo drives and motors.

Certified to BS EN ISO 9001:2008 quality standards, BSI-registered and an NICEIC-approved contractor, Transicon also offers a comprehensive range of management, consultancy, assembly, testing and support services to customers throughout the utilities, manufacturing, process engineering, marine and automation sectors.
